

Declaration of TREDT Union National Recession

7th February, 2024

In light of the current economic challenges facing the TREDT Union, we, the Union Government, hereby declare a state of national recession. This downturn in our economy necessitates swift and decisive action to mitigate its impact on our members and businesses.

As stewards of our Union's prosperity, we recognize the urgency of this situation and the need for proactive measures to address it. To this end, we issue the following directives to all companies operating within the TREDT Union:

- **Privatization of Operations:** In order to foster greater efficiency and adaptability in the face of economic uncertainty, we strongly advise all companies to consider privatizing their operations. This may involve restructuring ownership, streamlining processes, and embracing innovation to enhance competitiveness.
- **Investment in Imperial Bank of TREDT:** We urge companies to make substantial investments in the Imperial Bank of TREDT. By bolstering the financial strength of our national bank, we can better facilitate lending, stimulate investment, and support economic growth. The Imperial Bank stands as a pillar of stability in times of crisis and is integral to our efforts to overcome this recession.

By adhering to these directives and working together towards a common goal, we believe that the TREDT Union can emerge from this recession stronger and more resilient than ever before. Let us seize this opportunity to build a brighter future for all our members.

****TREDT UNION****
