His Most Excellent Sir,

I propose the establishment of a new political institution, *The National Institute for Transforming TREDT (NITT)*. This institute will provide a platform for all members of the Union to express their ideas and engage in meaningful discussions on any issue they believe is important for the future of the Union. It will serve as a forum for the betterment and transformation of the Union in the new millennium.

Currently, the lower and upper houses of the Union operate in isolation. NITT will bridge this gap, fostering collaboration and promoting unity among Union members. By bringing together diverse perspectives, it will help overcome differences and encourage collective action towards the development of our nation. This initiative is inspired by NITI Aayog and its role in fostering dialogue and governance reform.

The institute will be located on an island near the Parliament and the International Court of Justice (ICJ). It will be a three-story building with a basement. The ground floor will feature a community area and cafeteria for informal discussions. The first floor will house the main meeting hall for all formal sessions. The upper floor will be reserved for private meetings, with rooms available for small groups or individuals to hold confidential discussions.

Additionally, the basement will house a secure vault for archiving important documents, such as meeting records, bills introduced in Parliament, presidential orders, and other reserved materials, ensuring that all discussions and decisions are properly stored and accessible when needed.

I respectfully request that you grant approval for my company, USMC, to engage in mining activities in the oceanic region near Kaisergrad.

Thank you for your consideration.

Your Faithfully,

Ishaan Das
CEO
