TREDT Trading Company

Confidential Documents

17th February 2024

PARTIES INVOLVED

TREDT Trading Company

Imperial Industries

Union State Railways Company

Plan A

Abbreviations:

ATP: According to Plan

MCV: Market Capital

TTCO: TREDT Trading Company

URSC: Union State Railways Company

IBT: Imperial Bank of TREDT

Firstly, the TREDT Trading Company will give me at least a Million Emeralds. To start the plan. For that URSC will sue the TTCO for a million emeralds and then somehow, we will win the Case and then in compensation. URSC will accuse the TTCO of growing wine illegally without a permit and I will click photos of the farm.

In this plan the URSC will put up an order of 50K Iron Ingots from the Imperial Industries for a railway line that will be set up in the TREDT SMP.

Soumya (URSC) will place the order to the Imperial Industries.

Then IIL will provide the material at 60% lower than the Market Cost.

1 Iron Ingot: 2 Emeralds (Normal Cost)

$50,000 \text{ Ingots} = 50,000 \times 2 = 100,000$

But in the plan IIL will give us one ingot for 0.5 Emerald.

$50,000 \text{ Ingots} = 50,000 \times 0.5 = 25,000 \text{ Emeralds (ATP)}$

So, the TTCO will get 25K and we will profit about 75K and then we will secretly invest the 75K in the TTCO Stocks. Then the TTCO MCV will increase. In order to withdraw the MCV we will buy all the stocks from the stakeholders and then put it all together into a liquid Account, registered in the name of the TTCO at the IBT. After the entire process is done, we can do things normally. If Aaron and his company got to know we will trade all the stocks for money and then declare bankruptcy. But we will get accused of fraud so after declaring bankruptcy we will immediately shut the TTCO down and then dissolve it with the help of the Union Government.

Profit:

1 Iron Ingot: 2 Emeralds (Normal Cost)

$50,000 \text{ Ingots} = 50,000 \times 2 = 100,000$

But in the plan IIL will give us one ingot for 0.5 Emerald.

$50,000 \text{ Ingots} = 50,000 \times 0.5 = 25,000 \text{ Emeralds (ATP)}$

So, then:

URSC: Profit = 75K Emeralds

TTCO: Payment = 25K Emeralds

URSC: Will invest 75% of it into the TTCO Stocks.

That means:

75% of 75K will be invested and the remaining 25% will be invested into our company so we don't declare bankruptcy.

$75\% \text{ of } 75K = 75/100 \times 75,000 = 56,250 \text{ Emeralds}$

$\text{Remaining} = 75,000 - 56,250 = 18,750 \text{ Emeralds}$

The 56,250 will be going back to the TTCO and the remaining 18,750 will be invested into the URSC Stocks.

And this is called Artificial Demand in simple terms.

People Involved:

Naved Khan (Lt. Governor) (TTCO)
